

What the Constitution Means to Me

The United States Constitution is one of the most important documents in human history. It is the text that dictates how the global superpower of America runs its nation and its people. Without the civil liberties granted by the Constitution America would be a greatly different country. Because of this, the Constitution means to me the idea of life itself. Without this great document that guides our nation, we would be a nation of anger, control, and anarchy. The ability to speak freely in America is what makes our country as great as it is because without this amendment we would not be in the space of free flow of opinions we live in now.
